FROST: A WORK IN PROGRESS

Our vision and focus is to provide a broad platform of architectural elements that both inspire and provide comprehensive design and application solutions.

Our Danish culture of progressive contemporary design is conveyed through our products in a manner that blends design with function, creativity with solutions. Frost embraces the concept that Form is nothing without Function. Emphasis has also been placed on material, quality and service.

Frost has been the recipient of International Design Awards and we have realised that our company is a "Work In Progress" that we attribute to the ongoing dialogue with architects worldwide who have been embraced as part of our company's culture. Frost is more than a company: it is a vision and quest for excellence.

NOVA SERIES & HANGERS

Nova is a comprehensive serie of wardrobe products, sanitary hardware and bathroom fittings.

The serie is manufactured from satin or mirror polished stainless steel to resist the aggressive environment in toilets and bathrooms.

The simplicity and timeless design is based on form follows function. Nova can be combined in countless variations, which allow the individual user to create an individual style in all building types.
